## A Girl Created This, LLC

January 2017 • Current      Owner

**Developed an online bingo calling application called Let's Play Bingo**

- Created a pure object oriented JavaScript bingo application in 2017 and continuously improved upon it, refactoring it to ReactJS in 2018 and releasing new features periodically.
- Organically built an audience of approximately 50k users per month across 160+ countries.
- It is now used by bingo halls, churches, senior centers, bars and homes all over the world.

## Slalom

May 2022 • Current      Senior Consultant / Salesforce Developer

**Served as a subject matter expert on the Salesforce Experience Cloud team**

- Developed highly customized Salesforce Experience Cloud sites for a variety of clients.
- Established an internal component repository that is used to jump start projects and save hundreds of hours of custom development time.
- Built easily configured custom components for the repository such as powerful custom inputs, forms, Google ReCaptcha, custom metrics, partner directory listings, and more.

## 7Summits, an IBM Company

Jan 2020 • May 2022      Manager of Front-End Development
Dec 2019 • Jan 2020      Senior Front-End Salesforce Developer
July 2018 • Aug 2019      Front-End Salesforce Developer

**Mentored and lead a team of five front-end developers.**

- Conducted 1:1s and helped grow the careers of a team of developers of varying skill levels.
- Implemented Salesforce solutions to meet business requirements for Fortune 500 and other clients utilizing custom development as well as in-house lightning bolts and components.
- Developed and documented front-end development coding standards for the team.

## Canpango

July 2017 • July 2018      Front-End Developer / Salesforce Developer

**Served as the only front-end based engineer, filling a variety of needs for the start up.**

- Developed a custom account management application in ReactJS that eliminated approximately $6,000 per month in license fees upon its January 2018 launch.
- Seamlessly transitioned into Salesforce development to meet company needs.
- Developed solutions across a variety of platforms including ReactJS, Wordpress, Salesforce, Marketing Cloud, HubSpot, Pardot and others.
